

Smarter Cloud Solutions
Real-World Results

Business Overview

Contact: Prabhakar Ramakrishnan,
President & CEO

Phone: 571-303-9296

Email: prab@cloudwaveinc.com

Website: www.cloudwaveinc.com

Address: 1775 Tysons Blvd.
5th Floor, Tysons, VA 22102

CAGE Code: 878G8

DUNS: 043142222

UEI: KPV8FJJSW1B8

GSA Multiple Award Schedule
(MAS)

NASA SEWP V (Sub)

OASIS+ (Sub)

SIN: 518210C Cloud Computing

Differentiators

- Google Cloud Platform Partner
- Experienced Certified Technical Professionals
- 20+ Years of Government Contracting
- Reliable and Innovative Solutions
- Experienced Cloud Brokers

Proven Google Cloud & AI Expertise for Intelligent, Scalable Solutions

CloudWave delivers secure, AI-powered Google Cloud solutions that modernize infrastructure, unlock data insights, and accelerate mission outcomes for federal and regulated organizations.

Google at CloudWave

As a Google Cloud Platform partner, CloudWave provides end-to-end Google Cloud Platform (GCP) services, helping organizations design, build, and scale modern, data-driven and AI-enabled applications.

Core Platform Capabilities

AI, Machine Learning & Automation

- Document AI & Intelligent Document Processing
- Natural Language AI & Vision AI
- Custom AI/ML Model Development & Integration

Data, Analytics & Visualization

- BigQuery Data Warehousing & Analytics
- Real-Time Data Processing & Smart Analytics

App Development & Low-Code Platforms

- App Engine, Cloud Run, and Cloud Functions
- AppSheet for Rapid Low-Code Application Development
- Full-Stack Web & Mobile Application Development

API & Integration Services

- Apigee API Management & API Gateway
- Microservices & Web Services Architecture
- Integration with Enterprise Platforms (Salesforce, DocuSign, etc.)

Cloud Infrastructure & DevOps

- Google Kubernetes Engine (GKE)
- CI/CD Pipeline Implementation & Automation
- Infrastructure Architecture, Deployment & Optimization

Security, Identity & Compliance

- Identity & Access Management (IAM)
- SSO Implementation (SAML, OpenID Connect)
- Data Encryption, Logging, and Auditing
- Security Command Center

Google Projects

- **General Services Administration (GSA)** – As a Google Cloud Platform partner, CloudWave is implementing an AI/LLM-powered solution that enables users to interact with complex documentation through a conversational interface, delivering fast, accurate, and source-verified responses.
- **Google AI Solutions** – CloudWave has an extensive menu of Google AI agents that can be integrated into internal systems. Examples: AI Chatbot, Advanced AI Search, Document Digitizer AI, AI Proposal Evaluation, Case Management, Compliance Management, NLP, and More

Past Performance: General Services Administration (GSA)

CloudWave was awarded a **three-year prime contract** to design and implement an advanced **Artificial Intelligence (AI) and Large Language Model (LLM) solution** for the General Services Administration (GSA). This initiative is transforming how users access and interact with complex government documentation by introducing a secure, intelligent conversational interface.

Leveraging Google Cloud's AI and machine learning capabilities, CloudWave developed a solution that enables users to submit natural language queries and receive accurate, context-aware responses in real time. The platform integrates advanced natural language processing to interpret user intent, even for complex or multi-layered questions, significantly improving the accessibility of critical information.

A key innovation of this solution is its ability to provide authenticated, source-backed responses. By incorporating intelligent document processing and retrieval capabilities, the system ensures that all answers are traceable to authoritative source documentation—enhancing trust, transparency, and compliance in high-stakes environments.

The solution also streamlines information discovery by reducing the need for manual searches across large volumes of technical documentation. Using Google's search and AI technologies, users can quickly locate relevant information, accelerating decision-making and operational efficiency.

CloudWave is delivering this solution using Agile methodologies, ensuring continuous iteration, user feedback integration, and scalable deployment. The result is a modern, AI-driven knowledge platform that enhances user experience, improves productivity, and sets a foundation for future AI innovation across GSA.

Key Outcomes

- AI-powered conversational interface for natural language queries.
- Source-verified responses for improved trust and compliance.
- Reduced manual research and faster information retrieval.
- Scalable architecture supporting future AI/LLM expansion.
- Enhanced user experience across complex documentation systems.
